Bangalore, Karnataka - India

PROFESSIONAL SUMMARY

Final-year B.Tech student specializing in Artificial Intelligence and Machine Learning with strong backend and software development experience. Built and deployed production-ready applications including an NLP-based Fake News Detection system using FastAPI and a full-stack Rental Booking Platform using Django. Proficient in Python, REST APIs, and database design, with a solid foundation in data structures and problem-solving. Seeking a Software Developer Internship to build scalable, real-world systems.

EDUCATION

- Christ University** June 2023 - May 2027
B.Tech in Electronics and Computer Engineering (Specialization: Artificial Intelligence and Machine Learning)
Bangalore, India
 - CGPA: 8.3/9.5
- Sri Chaitanya** April 2023
Pre-University Education
Bangalore, India
 - Grade: 86.00%
- BGS Public School** May 2021
Secondary Education
Bangalore, India
 - GPA: 9.18/10

INTERNSHIP EXPERIENCE

- Software Developer Intern** Apr 2025 – May 2025
TechCiti Software Consulting Pvt. Ltd., Bangalore
 - Developed core backend and full-stack features for the Rental Home Search and Booking web application (detailed below) using Django, Python, and SQLite.
 - Gained hands-on exposure to complete software development lifecycle, code reviews, and enterprise database management practices.

PROJECTS

- Smart Irrigation System** August 2024
Tools: Relay Module, Moisture Sensor, Arduino R4 WiFi, Arduino IDE
 - Designed and built a fully automated IoT irrigation prototype that senses real-time soil moisture and controls water pump via relay module.
 - Programmed intelligent decision logic in Arduino IDE to trigger automated watering cycles, eliminating manual intervention and optimizing water usage.
- Fake News Detector** Nov 2025-Jan 2026
Tools: Python, Scikit-learn, Pandas, NumPy, TF-IDF, FastAPI, Streamlit
 - Developed and deployed an NLP-based fake news classification system using TF-IDF and ensemble ML models.
 - Built scalable REST APIs using FastAPI and integrated a Streamlit frontend for real-time analysis.
 - Designed end-to-end ML pipeline including preprocessing, training, and evaluation.
 - GitHub: <https://github.com/Malavika3026/Fake-News-Detector.git>
- Rental Home Search and Booking System: Internship Project** April 2025-May 2025
Tools: Python, Django, SQLite, HTML, CSS, Bootstrap, JavaScript
 - Led full-stack development of a secure rental booking web application using Django MVT architecture, implementing authentication and end-to-end booking workflows.
 - Designed and implemented a relational database schema using Django ORM, ensuring data consistency across users, properties, and bookings.
 - Built a responsive, frontend using Bootstrap and JavaScript, improving user experience and navigation.
 - Ensured robust backend validation and seamless system integration, delivering a production-ready application.
 - GitHub: <https://github.com/Malavika3026/Rental-Home-Search-.git>

TECHNICAL SKILLS

- Programming Languages:** Python (proficient), Java (familiar), C (familiar)
- Machine Learning and NLP:** Scikit-learn, Pandas, NumPy, NLP, TF-IDF Vectorization, Data Preprocessing, Model Evaluation
- Frameworks & APIs:** Django, FastAPI, Streamlit, REST APIs
- Database Systems:** SQLite, MySQL, Django ORM
- Tools and Platforms:** VS Code, Jupyter Notebook, Arduino IDE, NetBeans
- Core Concepts:** Data Structures, Object-Oriented Programming, Backend Development

CERTIFICATIONS

- AWS Academy Graduate - AWS Academy Cloud Foundations Sept 2025
- NPTEL Online Certification Course on Data Science for Engineers Jul 2024-Sept 2024
- Cisco Networking Academy CyberSecurity Course September 2024
