TECHNICAL SKILLS

- Agile/Scrum Methodologies
- User Acceptance Testing (UAT)
- Test Case Development
- Requirements Gathering Techniques
- User Story Formulation & Management
- Acceptance Criteria Documentation
- Requirements Engineering & Analysis
- Gap Analysis Methodologies
- Business Process Model and Notation (BPMN) Diagrams
- Stakeholder Management Strategies
- Business Analysis & Project Management
- Backlog prioritization

CORE COMPETENCIES

- Business Process Optimization
- Regulatory Compliance Frameworks
- Data Analytics & Visualization
- Stakeholder Engagement
- Risk Assessment & Management
- Agile Project Management
- Continuous Improvement Methodologies
- Cross-Functional Team Collaboration
- Change Management Practices
- Performance Metrics Development

PROFESSIONAL SUMMARY

Business Analysis & Process Optimization

- Possess a comprehensive background of **5 years** in **Business Analysis** within the fintech sector, driving improvements in operational efficiency and compliance.
- Developed a comprehensive skillset through diverse roles, including operations and quality assurance, with a strong emphasis on **Requirements gathering, user story creation, Acceptance criteria** ensuring alignment with business objectives.

Leadership & Stakeholder Engagement

- Collaborate with **Product Owners, Developers, and Stakeholders** to maintain project alignment and deliverables
- Recognized for **exceptional stakeholder management**, effectively bridging communication between technical teams and business units to ensure alignment on project goals and deliverables.
- Support Product Owners** in backlog refinement ensuring clarity, prioritization and alignment with business objectives.
- Build high-performing teams by fostering **effective communication, collaboration, and team dynamics**

Agile & Scrum Expertise

- Experienced in full **Software Development Life Cycle (SDLC)** and maintained extensive expertise in **Agile (Scrum) and Waterfall methodologies**.
- Agile Execution:** Facilitating Scrum ceremonies, including **Daily Stand-ups, Sprint Planning, and Retrospectives**, ensuring effective Agile execution and team collaboration
- Develop **Agile frameworks tailored to each team's unique needs**, focusing on value creation and efficiency
- Facilitate Scrum ceremonies: Sprint Planning, Daily Stand-ups, Sprint Review, and Retrospectives** to ensure alignment and continuous delivery.
- Define Sprint Goals**, select backlog items, and break them into actionable tasks to achieve strategic objectives
- Ensure achievable Sprint commitments by assessing **team capacity** and past **velocity**
- Identify and **remove impediments** to enable seamless sprint execution and shield teams from distractions
- Ensure deliverables meet quality standards by promoting accountability throughout the sprint cycle

Technical Proficiency

- Proficient in leveraging advanced analytical tools and methodologies, including writing **Basic SQL queries and data visualization techniques**, to extract actionable insights that drive strategic business decisions.
- JIRA & Workflow Management:** Managing JIRA workflows for optimal issue tracking, project transparency, and communication.
- Employ **advanced analytical tools and methodologies** to enhance strategic decision-making, ensuring that essential business requirements are effectively prioritized and addressed.

Continuous Learning & Development

- Facilitate the adoption of Agile methodologies at all organizational levels, promoting a culture of continuous improvement and adaptability.

TOOLS

- JIRAforProjectTracking&Management
- SQL(Basics)forDataExtraction& Validation
- Confluence&SharePointforDocumentation & Collaboration
- MSOfficeSuiteforDataAnalysis&Reporting
- MSVisioforProcessMapping&Diagramming

EDUCATION

B.Tech(ECE)-08/2014
JNTU EngineeringCollege
Hyderabad

KEYPROJECTS

- **AutomationProject**
Data Mining Optimization: Automated data mining within a CRM tool integrated with bankingsystems,**reducingmanualeffort**and improving onboarding efficiency.
- **PartyCentralAutomationProject**
KYCDDataRefresh:EnhancedKYCdatarefresh processes by streamlining data updates in Party Central, improving resolution time and system efficiency.
- **Language**

- English
- Hindi
- Telugu

Areas of expertise

- Banking
- Operations

WORKEXPERIENCE

Smart Beings Software Innovations (May 2022 – Present) |Business Analyst Responsibilities:

- **Banking Workflow Optimization:** Spear heading the analysis and optimization of banking workflows, ensuring seamless integration with core banking systems to enhance data verification processes and operational efficiency.
- **Documentation & Traceability:** Developing and maintaining comprehensive documentation including **Requirement TraceabilityMatrix (RTM), Functional Requirement Document (FRD), and Product Requirement Document (PRD)** to support project transparency and stakeholder communication
- **Requirements Gathering:** Conducting in-depth requirements elicitation sessions with internal and external teams
- **Stakeholder Management:**Performing stakeholder analysis using the **RACI matrix and Stakeholder Mapping**, defining roles and responsibilities to enhance project accountability.

Achievements:

- **Process Optimization:** Achieved a 15% reduction in project turnaround time through the implementation of advanced software tools within a short timeframe.

Prodapt Solutions (July 2021 – April 2022) Business Analyst Responsibilities:

- Developed value-added business strategies and analyzed field data that helped achieve \$100K in sales
- Implemented a QA automation tool that Reduced 55% of errors committed by users using a change control
- Was responsible to improve the efficiency of production workflow procedures.
- Participated in designing a CRM system , COMS systems
- Managed user engagement analytics strategy, providing first insight into how users interact with our apps on their tablets and mobile devices
- Developed an Excel macro and standardized reporting templates, resulting in efficient data collection and a 35% reduction in turn around time.
- Authored business requirements document for proprietary software application:
- Was responsible to led requirements elicitation sessions (including requirements analysis), solution assessment and
- Was responsible to on Testing, validating User stories, use cases and interface/functionality mock-ups
- Was responsible to co ordinate with business clients to analyze their business requirements and recommend design technological improvements to their business processes and operational procedures.
- Provided technical analysis to a development team on questions raised during development of a application
- Proficient in data analysis tools, Crucial for understanding and interpreting business data effectively.
- Experience with requirements gathering, Key to developing solutions that meet business needs.
- Demonstrated problem-solving skills, Essential for identifying and addressing business challenges.
- Ability to manage stakeholders, Important for ensuring alignment and facilitating effective communication.
- Developed and improved KPI dashboards, reducing time spent on monthly reporting by 10 hours
- Analyzed business processes and identified opportunities for automation, resulting in a 20% increase in productivity.
- Collaborated with clients to understand their requirements and developed tailored solutions, enhancing client satisfaction .
- Executed data validation strategies to ensure the integrity of client data, reducing errors
- Assisted in the preparation of detailed analytic reports, contributing to a 15% increase in project efficiency.
- Participated in workshops and training sessions to enhance skills in SQL improving the quality of data visualization.
- Supported senior analysts in understanding business requirements, leading to improved project outcomes and client satisfaction

Nano Tech Services (April 2015 – May 2021) Devops Support Engineer

- Release Engineer for a team that involved different development teams and multiple simultaneous software releases
 - Coordinate/assist developers with establishing and applying appropriate branching, labeling/naming conventions using GIT source control
 - Installed, administered, and configured Jenkins Continuous Integration (CI) tool
 - Developed build and deployment scripts using ANT and Maven as build tools in Jenkins to move from one environment to other environments
 - Researched and implemented code coverage and unit test plug-ins with Maven/Jenkins
 - Worked on Integrated JIRA with subversion and Jenkins to automate the weekly build process
 - Implemented puppet using best practices and an automated CD system
 - Implemented Continuous Delivery framework using Jenkins, puppet, and Maven in Linux environment
 - Used puppet for automating repetitive processes in Apache user administration, file management, and managing file and directory permissions in different environments
 - Designed puppet Modules to manage configurations and automate the installation process
 - Deployed puppet and puppet DB for configuration management to existing infrastructure Administered and Engineered Jenkins for managing weekly Build, Test and Deploy chain, SVN/GIT with
 - Dev/Test/Prod Branching Model for weekly releases
 - Installed, configured & administered Jenkins CI tool on Linux machines; set up Master-slave Server
 - One clicks Automation script to trigger push to production from Jira, invoke Build in Jenkins, and deploy to target servers
 - Implemented multi-tier application provisioning in OpenStack cloud, integrating it with Puppet
 - Experience working with continuous delivery and building clouds with OpenStack
 - Created scripts in Python which integrated with Amazon API to control instance operations
 - Used Subversion as source code repositories and Managed SVN repositories for branching, merging, and tagging
 - Analyze and resolve conflicts related to the merging of source code for GIT
 - Implemented the setup for Master-slave architecture to improve the Performance of Jenkins
 - Used Jenkins for Continuous Integration and deployment into Tomcat Application Server
 - Deployed Java/J2EE applications to Application servers in an Agile continuous integration environment and also automated the whole process
 - Environment: Java/J2EE, ANT, Maven, Subversion, GIT, Linux, Open stack, Puppet, Shell, Perl Scripts,
 - Python, Ruby, Jenkins, Tomcat, Jira
-
